
**WHEREVER
THE JOB,
ENJOY CANON
QUALITY PRINTING**

**IT ALL COMES
*TOGETHER***

Bring your plans to life in stunning detail, document your projects and improve the efficiency of your projects with a full range of print solutions that are up for anything.

THE PRINT MANAGEMENT SOLUTION THAT WORKS FOR CONSTRUCTION

First impressions count for a lot in business. A Canon print solution will help you impress clients with stunning design drawings, detail-rich project updates and professional quality reporting. Best of all, thanks to our flexible finance options that can be tailored to suit your project timings, you can access Canon-grade quality today.

Improve productivity

Canon's print management solutions contribute to serious productivity gains. With user-friendly interfaces that speed-up printing and copying, a Filing Assist feature that allows for rapid scanning, sorting and cloud storage, your people will have more time to focus on more profitable tasks.

Enhance security

Document security is a major consideration for the construction industry. With companies typically holding a range of sensitive information, from contracts to plans, security is paramount. Featuring restricted access settings, auto-delete modes and an automated alert system, Canon's print management solutions keep your information secure.

Simple set up

Canon's large format printers are surprisingly easy to set up. All you need to get started on site is an internet connection. There's no need for complex IT infrastructure, dedicated servers or VPNs. And once the printer is installed, everything works just like it does in the office.

Print anywhere

There's no need to go back to the office when you need something printed. Whether you're at HQ or out on site, you can access files stored in the cloud from your mobile device and send them to the nearest printer. You can even give contractors access to Canon printers without giving them access to your company network, so they don't have to get permission every time they need to print.

Short term rentals

We understand that things move quickly in construction. That's why Canon offers an attractive rental option for customers that need to be flexible in their operations. Short-term rentals give you the solution you need for the duration of your project, and don't bog you down with overheads you won't need once the project is delivered.

SHOWCASE YOUR POTENTIAL

Present stunning concepts, detailed technical drawings and highly accurate plans with a Canon large format printer. With a range of printers to choose from, there's one to suit your business.

Precise plans

Every millimetre counts in construction. Our large format printers produce highly accurate plans that show contractors exactly what's required at every step of your project. With fast printing, easy file handling and impressive colour matching, Canon's large format printers allow you to focus on your project rather than the quality of your documents.

Quality guaranteed

There's no compromising on quality with Canon. Our large format printers produce studio-grade prints every time. Colour matching is a breeze, the resolution is always spot on and plans feature every last detail. Add quality construction and impressive reliability to the mix, and you have a printer perfect for whatever you need to present.

User friendly

You don't need IT qualifications to operate Canon's large format printers. Everything, from releasing print jobs to changing the paper roll, is really simple. Best of all, you won't be standing around waiting for prints. Even highly detailed CAD drawings can print inside 20 seconds.

Your own print shop

Bring your professional printing in house with the printer the professionals use. With quality printing on site, you can increase efficiency, reduce print supplier expenses and safeguard critical business information. After all, walking to the print room is quicker and easier than booking a job with a commercial printer.
